

MOHD ASHFAQUE ANSARI

Full Stack Web Development • AI Engineering • Data

Lucknow, Uttar Pradesh, India | +91-9871948186 | ashfaque3777@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

B.Tech Computer Science & Engineering student specializing in Artificial Intelligence & Data Science, with hands-on experience building full-stack web applications, RAG systems, agentic AI workflows, and data dashboards. Experienced with React/Node.js, Python, REST APIs, SQL/NoSQL databases, LLM APIs, retrieval systems, and collaborative Git workflows. Seeking full-time opportunities in full-stack development, AI engineering, and data-focused roles.

TECHNICAL SKILLS

Languages: Python, C, HTML, CSS, JavaScript, SQL

Full Stack: React.js, Vite, Node.js, Express.js, REST APIs, Authentication/JWT, Tailwind CSS

Databases: MySQL, MongoDB, ChromaDB, PostgreSQL

AI/GenAI: OpenAI API, Gemini API, Groq API, RAG, Embeddings, Vector Databases, OCR, LLMs, Agentic AI, LangGraph, LangChain, Prompt Engineering, Structured LLM Output, Function/Tool Calling

Data: Power BI, Tableau, Pandas, NumPy, Data Cleaning, EDA, Data Visualization, Excel

ML/DL: Scikit-learn, TensorFlow, Keras, PyTorch, Hugging Face

Tools: Git, GitHub, VS Code, Postman, Docker, GitHub Actions, Vercel, Railway, Netlify

EXPERIENCE

International AI Intern | [AlforAll Global](#) • 18 May 2026 – Present

- Selected as a standout performer in the AlforAll Global International AI Internship Program, recognition communicated by email, with certificate to be issued.
- Collaborated on 2 real-world AI projects involving RAG and agentic AI workflows while applying AI engineering concepts and team development practices.
- Implemented AI engineering components across a RAG chatbot and agentic mortgage underwriting system involving retrieval, LLM, OCR, structured outputs, and agent workflows.

Data Science | [Hanumant Technology Pvt. Ltd.](#) • 15 Jul 2026 – Present

- Created 12+ data visualizations and 2 dashboards using Power BI and Tableau based on prepared datasets.
- Worked with Python, Excel, MySQL, and MongoDB for data preparation and visualization workflows.
- Applied hands-on data cleaning, missing-value handling, EDA, visualization, joins, and aggregations while building dashboard outputs.

Full-Stack Web Development Intern | [Hanumant Technology Pvt. Ltd.](#) • 01 Jan 2024 – 30 Jun 2024

- Built 9+ small web applications and responsive webpages, including calculators, analog/digital clocks, digital fan, to-do list, tic-tac-toe, sign-up page, restaurant pages, and e-commerce functionality.
- Practiced frontend development, responsive UI implementation, JavaScript-based interactions, and full-stack application fundamentals.

PROJECTS & OPEN-SOURCE CONTRIBUTIONS

Agentic AI Mortgage Underwriting System -- Decision Agent | [AFA-interns/Mortgage-Underwriting-System](#) • 2026

- Implemented the Decision Agent for an agentic mortgage underwriting workflow using LangGraph, with state/schema handling, risk assessment, decision logic, and structured outputs.
- Designed the agent to process 4 underwriting input categories to generate 3 decision outcomes: Approve, Deny, or Suspend.
- Contributed through Git-based team development; implementation was merged into the project repository.

RAG-based AI Chatbot | [AI / RAG Project](#) • 2026

- Built a Streamlit RAG application for document-based question answering with PDF ingestion, PyMuPDF, Tesseract OCR fallback, chunking, metadata, BGE-large embeddings, ChromaDB, BM25 + dense hybrid retrieval, and cross-encoder reranking.
- Integrated 3 LLM providers -- OpenAI, Gemini, and Groq -- with citations, multiple-document support, chat memory, model routing/fallback, and RAGAS evaluation across 50 benchmark questions.
- Executed the end-to-end system to learn and demonstrate practical AI engineering and RAG concepts.

AI_Nexus -- Open-Source Contribution | [nazishfirdaus/AI_Nexus](#) • 2026

- Contributed 4 commits implementing project configuration, document chunking and metadata, ChromaDB, hybrid retrieval, Presidio/PII handling, quota tracking, fallback + aggregation, automated tests, and RAGAS evaluation; changes were merged into the repository.

[AptInnova Website](#) | **React / Vite Web Application** • 2026

- Developed the frontend foundation using React, Vite, JavaScript, CSS, responsive design, 10+ reusable UI components, and animations.
- Frontend was adopted as the base code for the company's actual website; collaborated through Git/GitHub workflows and deployment.

E-Commerce Website | **React / Node.js / MySQL** • *Personal Project*

- Built a full-stack e-commerce application with React/Vite, Node.js/Express, MySQL, REST APIs, authentication/JWT, CRUD operations, cart, orders, admin panel, image upload, and frontend-backend integration.
- Implemented role-based authorization for 2 user roles, theme switching, form validation, error handling, and responsive UI.

EDUCATION

B.Tech -- Computer Science & Engineering (Artificial Intelligence & Data Science) | Khwaja Moinuddin Chishti Language University | Expected 2027

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Artificial Intelligence, Machine Learning, Deep Learning, Cloud Computing

LANGUAGES

Hindi -- Native | English -- Professional
